Overview:-

At the outset, we would like to talk this opportunity to introduce ourselves as one of the leading Trading and contracting companies in Kuwait. We provide customized software's, Barcode related and Data-collection devices with a focus on integration of software applications with way-out and futuristic hardware's and provides maintenance and support to both commercial and support to both commercial and government customers. We have purchasing agreements with major hardware companies.

The company has grown at a high rate in the past 9 years. Aldiera Excellence has a highly motivated team of workforce and capable executive leaders, which has made Aldiera Excellence the frontrunner in Customized software's and Auto ID and data-collection technology products.

Mission:-

Aldiera Excellence mission is to provide our customers with high quality innovative information technology solutions. Our mission includes the development of customized software applications, introduction of quality and ever-bettering Auto ID and data-collection products to Kuwaiti customers. We seek to create a technologically perfect work environment that helps in output optimization and in-turn the evolution of the firm. The success of systems we have provided to our ministerial and commercial customers talks much about the flexibility and foreseeing with we created the systems.

Asset Management Software:

This is one of the most installed software Aldiera Excellence has ever produced. It is comprehensive, wide-ranging and inclusive of various modules covering tracking of assets and consumables.

Since Assets are the backbone of every organization, it has to be managed and tracked properly. Our Asset tracker software is simply doing it. It provides integration to barcode and data collector technology. Through these technologies manual data recording on new assets additions, reallocation or deletion is eliminated.

It is loaded with powerful reporting tools that will allow you to analyze and interpret data more accurately to make more informed business decision. The software is completely bilingual and secure. We have customized this software also for each customer's needs.

The Front-end of the software is VB and the back-end is SQL server.

The advantage of using Asset Management Software:

Our software helps you reduce costs, control complexity and improve service levels. You gain business advantage by seeing complete, real- time information about your enterprise-wide infrastructure and resources. Our software gathers vital inventory and utilization information about your assets and consumables. It shows you how often and how much your end user interact with their assets, And it uses a single data repository that lets you analyze your assets and its allocation from whatever perspective you need: from an enterprise- wide view of trends across your organization environment, to detailed utilization patterns for a single asset. Most importantly. These are business -centric analyses and reports that enable you to make effective, data-driven decisions.

Price Checking Software:

Aldiera Excellence has been a forerunner in designing software customized for the varying needs of retail industry in Kuwait market, which can be easily integrated with innovative hardware's that uses inventive technologies. Our new software, which has been designing and materialized by our well-trained software professionals, as usual, has something new to offer. Actually, this is two software's (one Handheld PC software and one Desktop software) combined to an excellent effect for a number of purposes. The handheld PC on which our software works is the new Windows based data collector Falcon 4210, which our software works is the operating system. The software uses SQL service CE as database and is completely bilingual. Below mentioned are the modules Software.

Price Checking Module:

This module actually rechecks the price of the items using data- collector. When Data-collector, with the help of the integrated barcode scanner, scans the items, this module pulls the information like price and details of the item from the database and lets you to recheck the price with the price coded on the item. Any mismatches or conflicts on the price can be added to the list and download to the desktop. There is an option for pilling all or some particular items from your main database and also those items whose price got updated. The Desktop software actually helps in pulling the needs items. First the items from the database gets upload to the desktop software and then, in turn, to the data-collector.

Inventory Module:

You can take the inventory also through our software. Through data- collector scan each item or you can scan the particular item and enter its quantity. After Inventory you can send the inventory details to the server. Moreover, there is an option with you can take the inventory of the damaged items only you can send it separately.

Purchasing Module:

Want better supervision on purchasing? The purchase module in our system helps you in organizing the purchase information i.e. how many of this to be purchased for this branch, How many of this is already put on purchase order? Etc. With the help of a RF printer, you can, from the data-collector itself, print the purchase order and gets the work done very fast.

Reporting:

Our software dose provides 3 informative at its best and up-to-the- point reports. File integration with leading report writers like Crystal Report is an important feature of this. The first one is a report on purchasing module, which it details out the items to be purchased on the basis of supplier. You can get a report of the items to be purchased from a particular supplier. There are 2 reports on Inventory report of the damaged items which is listed for each supplier is the other one.

Optical Mark Readers, Exam Evaluator & Datacollection System, Barcode Readers, Barcode Printers & Check Readers, Asset Tracker, Warehouse Management, Price Checking.
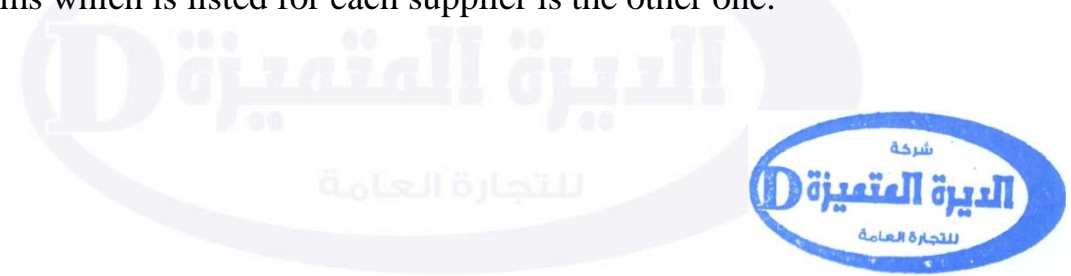

Tel: 99165735 - 65666220 - Email: info@iffefaqsoft.com - mshahzad8@gmail.com - Web: www.ittefaqsoft.com

Barcode Pack Software:

This is one another software we designed for retail industry. In this one also we make use of hardware's like data-collector. Modules are written below.

Purchase Order Module:

This module pulls the purchase order information from the database and takes out all receipts & Issues for printing Barcode labels.

Barcode Module:

Receipts of all the local items get separated from the International items and barcode can be printed for these items. For printing each label, a fixed amount can be charged on the corresponding supplies. Invoice for this can be printed.

Report Module:

This software is also equipped with some result-oriented and up-to- the point reports. Some of them are given below.

- Labels Report By supplier.
- Labels Report Invoice.

Barcode Related Products:

Identification with the help of barcodes hasn't been something new. You can see barcode in each and very fields of life. Each and every product you buy carries a barcode.

We supply all types of barcode scanners, barcode printers and data- collectors. Barcode scanners are used for reading barcodes and sending it to the system. Printer for printing all types of barcodes. Data-collector is like a portable PC which you can go anywhere, scan the data and retrieve it later for management of data.

We can give you a barcode system for your inventory needs, which includes scanner, printer and the required software.

Data-collection Devices:

We have been providing with quality data collection products to our valuable customers. Of various competence and capabilities were supplied. We have DOS based and Windows based data-collectors. The new PSC Falcon 4220 uses Windows CE.Net, These data- collectors possess memories up to 128 MB.

The collected data can be sent by batch way or by using RF technology. Once it is given the power, data-collector will work for 5- 6 hours. We have made a number of customized bilingual applications for these data-collectors. The machine is easy-to-use and the interface is user-friendly,

For more information about our data-collection products please visit.

MSR and MICR Reader:

We are the authorized distributors of Magtek and MSR and MICR readers. Magtek offers the largest selection of products in this industry. Swipe card readers from Magtek were unmatched and were a big hit in the industry. Their recently released Excella is an option-rich and comprehensive check-reading unit and we are sure that this will be the best-todate check reading experience banks and financial institutions in Kuwait have had. Its speed, read-reliability and accuracy have been much talked-about.

Also we have designed a check-reading software (Captures check front and back-for late-retrieval) which is integrated with Magtek Excella reader.

Scantron Scanner (Optical Mark Readers):

We are the authorized distributors of scantron OMR (Optical Mark Reader) scanners also. It is for scanning bulk sheets of data. The software comes along with this scanner verifies and analyzes the data.

The software can be programmed and customized according to customer's needs. It is used for Testing and Assessment scoring, Admissions and enrollment etc. Ministries and educational establishments in Kuwait have been invariably using it.

Using Optical Mark reader technology, we have designed software's for Election and Examination/test/survey. This solution-oriented system is newly released and is expecting the same response as our Asset Tracker and Price checking system got.

The Software's We have designed in-house:

- Assent Tracker (Comprehensive Asset and Warehouse Management Solution)
- Smart Retailer (integrated solution for retail industry)
- Inventory Tracking Software
- Accounting System
- Evidence Tracking System
- Warehouse Management System
- Exam Evaluator System
- OMR Election System
- Check Archiving System

Our Principals:

- ❖ Scantron Scanner (Data-collection through optical mark recognition and image collections)
- ❖ Sekonic Scanner (Data-collection through optical mark recognition and image collections)
- ❖ DATAMAX (Leader in bar-coding Printing Industry)
- ❖ NCS-Pearson (Data-collection through optical mark recognition and image collections)
- ❖ Magtek
- ❖ Metrologic
- ❖ Epson
- ❖ Symbol
- ❖ Zebra

Moreover, we are the authorized resellers of a lot of suppliers of all varieties of barcode and data-collection related products.

Major projects we have undertaken in the year 2001-2024:

- ❖ Supplied and Installed our OMR System (Two Systems) in Ministry of Planning.
- ❖ Supplied and installed our Asset Management software in Kuwait University Main Store.
- ❖ Supplied and Installed our Evidence Tracking System in Ministry of Interior Affairs.
- ❖ Supplied and Installed our Asset Management Software in Kuwait University College of Computer Center.
- ❖ Supplied and Installed our Asset Management Software in Kuwait University College of Administrative Science.
- ❖ Supplied and Installed our Asset Management Software in Public Authority of Civil Information.
- ❖ Supplied and installed our Asset and Consumable Management Systems in Kuwait Finance house.
- ❖ Supplied and Installed our OMR System and Software in Arab Open University.
- ❖ Supplied and Installed our OMR System and Software in Ministry of Health.
- ❖ Supplied and Installed our OMR System and Software in Ministry of Education
- ❖ Supplied and Installed our OMR System and Software in Public Authority for Applied Education and Training. Etc.
- ❖ Supplied and Installed Asset Tracking Warehouse Management System in Al-Ahli Bank of Kuwait.
- ❖ Kuwait Oil Company Installed Agricultural Management System in KOC Building Maintenance Service. The project is commissioned.
- ❖ Supplied and our OMR System in Kuwait University College of Administrative Science.
- ❖ Supplied and installed our Bar-coding System in Bader Al-Mulla Co.
- ❖ Provides Auto ID products and required customized for Co- operative Societies all over Kuwait.

Maintaining the all above mentioned products.
